Crossroads Denim a Huge Success!!

Amy Barickman is one smart and creative woman! She was the inspiration behind Thompson doing this line of Washed Denim solids. This fabric has taken off so fast we are having a hard time keeping up with demand. We have amped up production and should be in a great stock position to ship all of the 14 shades within 3 days by mid-Fall. If you haven't yet seen this soft-but-beefy 10 oz. fabric yet, please call Thompson to get a sample! The Washing process gives the fabric a nice texture, a real worn look..

Indygo Junction, Amy's design company, has 8 patterns designed for Crossroads. End uses include jackets, bags, tunics, embroidery and appliqué projects, baskets, furniture fabric, home décor and children's apparel. Visit their website for this and other exciting creative projects and ideas:
